MENTORUP

Project Overview

The Problem

Design a mentor request flow for a local school

The Product

Find My Shop is an website to help students of a school find mentors to guide them in their studies.

The Goal

Design a responsive website for Mentor Up that helps students of a school find mentors to guide them in their studies. .

My Role

UX designer designing an app for Mentor Up from conception to delivery.

Responsibilities

Conducting interviews, paper and digital wireframing, low and high-fidelity prototyping, conducting usability studies, accounting for accessibility, and iterating on designs

Project Duration

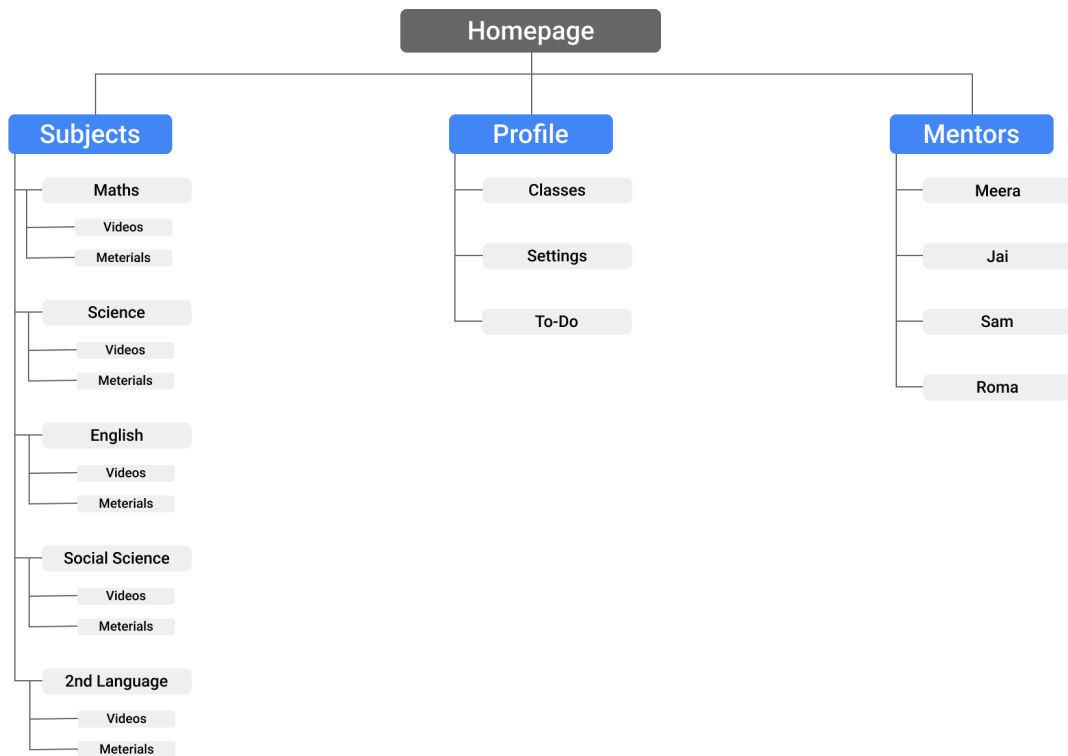

December 2021 to January 2022.

Understanding The User

I conducted interviews and created empathy maps to understand the users I'm designing for and their needs. A primary user group identified through research were students between the ages 12-16.

Takeaways

Impact

The app highlights the fact that Mentor Up is truly interested in their needs.

What I learned

While developing the Mentor app, I discovered that the initial concepts are only the beginning. Each design iteration was influenced by usability research and peer feedback.

Next Steps

1. Testing

Conduct another round of usability testing to ensure that users' concerns about pain have been addressed appropriately.

2. User research

Conduct additional user research to evaluate any additional areas of need.
